

NEXUS-GH

Business Management Platform for Ghanaian Entrepreneurs

User Guide & Documentation — Version 1.0 — 2026

An all-in-one POS, inventory, invoicing, and CRM platform — built specifically for Ghanaian SMEs, with full Mobile Money support and automatic Ghana tax calculations.

Developed by **Erick Amoah** — GENESIS

1. About Nexus-GH

Nexus-GH is an all-in-one business management platform built specifically for Ghanaian entrepreneurs and small-to-medium enterprises (SMEs). It brings together the essential tools your business needs — Point of Sale (POS), inventory management, invoicing, customer relationship management (CRM), expense tracking, staff management, supplier management, and business analytics — all in one seamless, easy-to-use application.

Nexus-GH is built with Ghana in mind. It supports Mobile Money (MoMo) payments for MTN, Telecel, and AirtelTigo, automatically calculates Ghana's applicable taxes (VAT 15%, NHIL 2.5%, and GETFL 1%), and includes region-based customer management covering all 16 regions of Ghana.

2. Key Features

Point of Sale (POS)

A fast, touch-friendly sales terminal designed for speed and accuracy. Supports barcode scanning, Mobile Money QR payments, discount management, receipt printing, and customer loyalty tracking.

Inventory Management

Track your stock in real time with full support for product categories, SKU codes, cost and selling prices, low-stock alerts, reorder levels, and automatic stock deduction upon every completed sale.

Smart Invoicing

Create professional, branded invoices with automatic sequential numbering, built-in Ghana tax computation (VAT, NHIL, and GETFL), PDF export, and real-time status tracking — from Draft and Sent through to Paid or Overdue.

Customer Management (CRM)

Maintain detailed customer profiles including contact information, regional data, loyalty points, purchase history, and personal notes. Build stronger relationships and encourage repeat business with a clear view of every customer's journey.

Expense Tracking

Record and categorize all business expenses with date tracking, receipt uploads, and spending analysis to keep your finances accurate and under control.

Staff Management

Add and manage your team with role-based access control (Owner, Manager, Cashier, and Stock Keeper), secure PIN-based login, and staff status management.

Supplier Management

Maintain a comprehensive supplier directory with contact persons, phone numbers, locations, and details of products supplied — so you always know who to call when you need to restock.

Reports & Analytics

Visual dashboards give you an instant view of your business performance: sales trends, revenue analysis, top-selling products, payment method breakdowns, and key business metrics — all updated in real time.

Business Settings

Customize your business profile, receipt headers and footers, logo, tax preferences, and Mobile Money merchant IDs to match your brand and operational requirements.

3. Getting Started

Follow the steps below to set up your Nexus-GH account and begin managing your business.

Step 1	Create an Account Visit the Nexus-GH website and click 'Get Started.' Enter your full name, email address, and create a secure password. Check your inbox and verify your email address to activate your account.
Step 2	Set Up Your Business Once logged in, you will be guided through a quick onboarding process. Enter your business name, select your region in Ghana, and provide your business phone number and address.
Step 3	Add Your Products Navigate to the Inventory module and add your products with their names, prices, quantities, SKU codes, and categories. You can also upload product images for easy identification at the POS.
Step 4	Add Your Customers Go to the Customers module to add your regular customers with their contact information and region. This enables better relationship management and loyalty tracking.
Step 5	Start Selling Open the POS module to begin processing sales. Search for or scan products, add them to the cart, apply any discounts, select the payment method (Cash or MoMo), and complete the transaction.

Step 6	Create Invoices For credit sales or formal billing, use the Invoicing module. Ghana taxes are calculated automatically based on your business settings, saving you time and ensuring compliance.
Step 7	Track Your Expenses Record all business expenses in the Expenses module to maintain accurate financial records and gain a clear picture of where your money is going.
Step 8	View Your Reports Visit the Dashboard and Reports section to access real-time business insights, sales trends, and performance analytics — all at a glance.

4. Navigating the App

Nexus-GH is designed to be intuitive on any device. On desktop, the application features a sidebar navigation panel. On mobile devices, navigation is available through a bottom navigation bar.

The main modules accessible from the navigation are:

- **Dashboard** — Your business overview and key metrics at a glance.
- **POS** — The sales terminal for processing transactions.
- **Inventory** — Manage your products and stock levels.
- **Invoices** — Create and manage professional invoices.
- **Customers** — Your customer database and CRM tools.
- **Expenses** — Record and analyse your business spending.
- **Suppliers** — Manage your supplier contacts and details.
- **Staff** — Add and manage your team members and their access roles.
- **Reports** — In-depth analytics and business performance reports.
- **Settings** — Configure your business profile and preferences.

Every module includes search, filter, and pagination capabilities to help you find and manage your data quickly and efficiently.

5. Pricing Plans

Nexus-GH offers three plans to suit businesses at every stage of growth. All plans include full access to core POS and sales features.

Feature	Starter	Business GH■ 99/mo	Enterprise GH■ 249/mo
